FEATURES

■ **Compact:** Design has an integral shallow well adapter built into the casing, which eliminates the need for a separate shallow well adapter.

■ Serviceable:

- Back pullout design allows disassembly of pump for service without disturbing piping.
- Two compartment motor for easy access to motor wiring and replaceable components.
- Nozzle clean out plug in pump case.
- Corrosion resistant, engineered plastic tubing and fittings are easily removed for cleaning. Premium O-ring design fittings need only be hand tight to seal.

■ **Impeller:** F.D.A. compliant, glass filled Noryl®. Corrosion and abrasion resistant.

■ **Diffuser (Guidevane):** Bolt down diffuser provides positive alignment with impeller. Diffuser also has stainless wear ring for extended performance in abrasive conditions. F.D.A. compliant, injection molded, food grade, glass filled Lexan® for durability and abrasion resistance.

■ Tubing and Fittings:

F.D.A. compliant engineered plastic is corrosion and U.V. resistant.

■ Powered for Continuous Operation:

Pump ratings are within the motor manufacturer's recommended working limits. Can be operated continuously without damage.

■ Corrosion Resistant:

Electro-coated paint process is applied inside and out, then baked on.

■ Protected Mechanical Seal:

Special diaphragm design retains water in the casing at all times to ensure the mechanical seal can never run dry.

■ Excellent Air Handling Ability:

After initial priming the pump has the ability to re-prime itself even when air gets into the system. Pumping resumes once the water level rises above the foot valve.

SYSTEM COMPONENTS

■ Basic Pump Unit:

Includes pump with integral shallow well jet (nozzle and venturi), motor, pressure switch and tubing.
